

Young people and cyber crime – a briefing for education professionals

How to help young people with tech skills from getting drawn into cyber crime

More and more young people are getting involved in cyber crime. Many do it for fun without realising the consequences of their actions. Cyber crime isn't a victimless crime and is taken extremely seriously by law enforcement. The aim of this event is to show what education professionals and others involved with young people can do to understand, identify and help to educate young people about the risks.

Target group	Education and social care professionals, school leaders, designated safeguarding leads, teachers, network managers/technical leads, school governors. The session is intended to be relevant for primary (KS2 in particular) and secondary phase colleagues.
Date	Monday 4 th May 2020
