Filtering and Monitoring Solution to support DFE Starlink Pilot Scheme – Laddingford St Mary's CoE Primary School

**SEGfL Empowers Rural School with digital safety through
Advanced Filtering and Monitoring.**

What was the issue?

- Laddingford Primary, a rural school, faced major connectivity challenges and needed a secure internet solution. As part of the DFE Starlink Connectivity pilot, they gained internet access but lacked essential filtering and monitoring, rendering the connection unusable.

How we approached it

- SEGfL provided a tailored filtering and monitoring solution for Starlink, along with guidance and support. We also addressed inconsistent Wi-Fi speeds throughout the building by securing discounted wireless access points for the school.

The value we added

- With SEGfL's support, the school now has secure, high-speed satellite internet, along with improved connectivity throughout the building—demonstrating our commitment to both affordability and functionality.

“The service provided by SEGfL has been nothing short of outstanding. What began as a potential crisis—our tiny primary school in a rural village facing a lack of internet connectivity—was quickly turned around when SEGfL stepped in.

Not only did they help us navigate the complexities of finding a reliable internet provider, but they also made us the first school in the country to implement Starlink, revolutionising our connectivity.

The team's support has been exceptional, especially for a new Headteacher, as they patiently explained the differences between filtering and monitoring systems, ensuring we felt confident every step of the way. They went above and beyond, providing us with discounted equipment to help us make the Starlink package a reality.

Thanks to their dedication and expertise, our school is now well-equipped and thriving. We cannot recommend SEGfL highly enough for their incredible support and commitment to our success.”

-Mrs Lucy Clark, Headteacher
